

MindConnect IoT Extension Training Product Sheet

This one-day training provides insights in the connectivity possibilities of MindConnect IoT Extension. MindConnect IoT Extension is a connectivity layer that expands the number of protocols that can communicate with MindSphere by using predefined agents. Learn in this training how to use MindConnect IoT Extension to connect your assets to MindSphere, get a better understanding of the compatible elements and supported protocols. The MindSphere security concept and the onboarding process of a new agent are covered in detail. You will put the acquired knowledge into practice by connecting step-by-step the predefined agent to MindSphere.
